## CALL FOR ABSTRACTS

### Special session on *PHM in Railways*

#### **Description**

PHM ( Prognostics & Health Management) in Railway: achievements to date, way forward, key success factors and hurdles

#### **Motivation**

The Railway Industry is and will be increasingly a major contributor to transportation sustainability. At the same time, its economic viability very much depends on high service quality and low life-cycle cost. Advanced maintenance methods relying on PHM are expected to contribute to those goals.

#### **Objective**

To bring together railway OEMs, infrastructure managers, network operators and asset managers to exchange best practices and challenges in developing and deploying predictive maintenance, including technical aspects but also data sharing and business model considerations.

**Please submit your abstract by January 25, 2021**

Please submit your abstract through the conference website, <http://phmeurope.org/> . Also, please send a copy of the abstract by email to the special session organizers.

#### **Organizer**

Dersin Pierre, [pierre.dersin@alstomgroup.com](mailto:pierre.dersin@alstomgroup.com), [pierre.dersin@ltu.se](mailto:pierre.dersin@ltu.se)  
ADM RAM Director, Alstom, and Adjunct Professor, Luleå tekniska universitet
